

Chris Collins – Technical Sales
New Market, MD

With both a BA in Economics from the University of Michigan and a BS Building Materials Management and Wood Technology from The University of Massachusetts, Chris specializes in all phases of developing a project, from individual structural components to entire structural packages, including frame labor. He is a certified user for Trus Joist and Mitek engineering software for engineered lumber, I-joists, roof trusses and floor trusses. Prior to his **10 year** tenure with SSI, he was a research analyst for Scudder, Stevens and Clark, and was in Construction for Fielding and Associates.

Favorite aspect of working for SSI? The quality of the people at SSI combined with the company attitude that promotes a fun, respectful work environment. Chris enjoys outside activities, including fishing, camping, mountain biking, and hiking, and actively supports the Alzheimer's Association. Chris specializes in complicated jobs incorporating consultation at the design phase where customers get the most value out of him and he achieves the greatest satisfaction. He services MD, WVA, Northern VA, and Southern PA.
